SOFTWARE ENGINEERING FELLOW

GENERAL ASSEMBLY, REMOTE – 09/27/21 – 12/23/21

- General Assembly's Software Engineering Immersive (SEI) is a three-month fellowship dedicated to preparing individuals to think like engineers and approach problems creatively in order to build the next generation of web applications and digital products. Skill development in the areas of: HTML, CSS, JavaScript, jQuery, Node, React, Express, Mongoose, MongoDB, Python, and more.

OPERATIONAL METEOROLOGIST

DTN, MINNEAPOLIS, MN – 02/20/18 – 08/09/21

- Produce tailored forecast products for numerous high-profile energy, transportation, and sports & recreation clients across the United States year-round.
- Analyze observed hydrometeorological data to monitor client locations and to issue advisories, watches, and warnings for weather and climate hazards.
- Effectively convey complex weather information to clients and to the general public through interpersonal consultation.

P R O F I L E

A meteorologist turned full stack developer and a problem solver by nature, I am always learning and looking for ways to improve my skill set. In my previous career, I craved an even deeper involvement to develop applications and help kickstart further innovation within the meteorology field to create useful and insightful products to help maximize efficiencies.
